

Immix Site-Link

Immix Site-Link is a solution which serves as an **'easy button'** for integrators and monitoring centers to quickly connect the technology at a site to a central station utilizing Immix.

The cornerstone of the Immix Site Link solution is its full-featured integration with the Immix platform which simplifies and expedites the setup process, bypassing the need for port-forwarding and allowing central stations to begin services more quickly.

Benefits of Immix Site-Link

- Standardized onboarding experience
- Alleviates strain on IT professionals by preventing the need for in-depth networking discussions
- Rapidly scale services
- Expedites the time between installation and when monitoring services begin

Immix Site-Link Partner Camect
