Data-Driven Remote Guarding

TrackTik and Immix revolutionize enterprise security with a unified platform that harnesses real-time analytics and AI for proactive threat detection and optimized resource allocation. Our smart, remote guarding solution empowers organizations to proactively tackle security challenges through data-powered decision-making.

OUTCOMES

TrackTik + Immix
connects to help you:

- Respond faster and accurately
- Expand surveillance coverage
- Improve compliance & auditability
- Future-proof security operations

Trackforce + Immix Features

Closed-Loop Automation

Automated incident escalation and dispatch from SOC to field, reducing manual intervention and response times.

Unified Command & Control

Centralized management of all security events—alarms, video, access control, and patrols—on a single, browser-based platform.

AI-Driven Event Processing

Leverage AI and analytics to filter out false positives and prioritize real threats, optimizing resource allocation.

End-to-End Reporting & Compliance

Structured workflows ensure full audit trails and regulatory compliance, with integrated billing and invoicing for all services.
