Investigation Module
Powered by: CAPTIS INTELLIGENCE

Real-time intelligence fully integrated into the Immix workflow

Who is Captis

Captis Intelligence has built the first centralized cloud-based subject intelligence system connected to the world's largest private database of 100 million + open-source criminal files.

ODSI (On Demand Subject Intelligence), is a highly accurate face-matching system allowing professional monitoring agents an industry-first capability to immediately identify suspects from surveillance video.
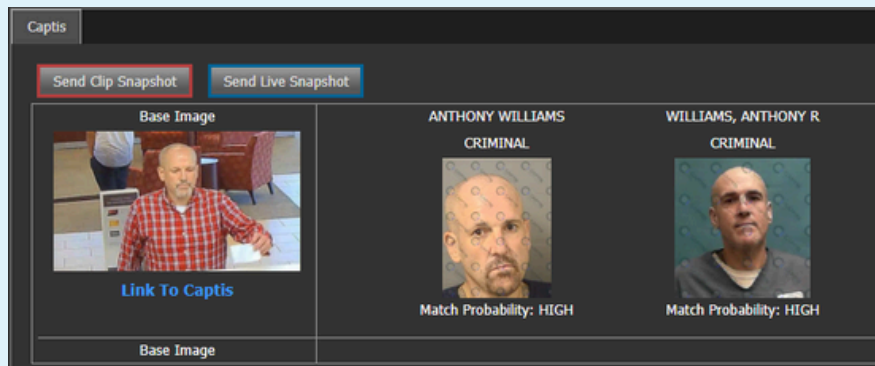

How it works

1 An operator observes suspicious activity during an event

2 The operator sends a snapshot from the live camera, alarm, or event audit to the Captis system
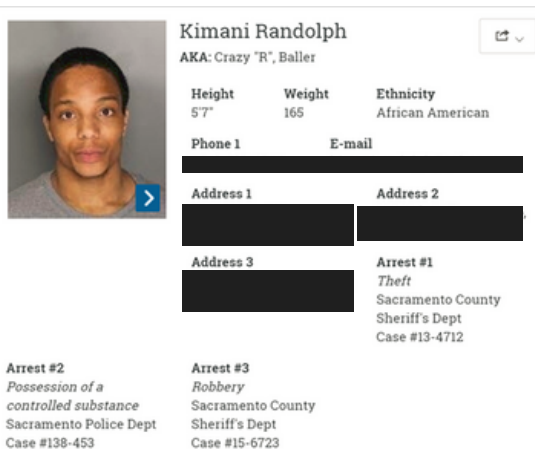

Alarms   Previous Event   Map   Captis
Clip   Live

3 The Captis system automatically scans the image against its database and returns the results back into Immix

Base Image

ANTHONY WILLIAMS
CRIMINAL

Match Probability: HIGH

WILLIAMS, ANTHONY R
CRIMINAL

Match Probability: HIGH

Results include:
- Full name
- Subject type
  - Criminal
  - Terrorist
  - Missing Person
- Match probability
- Mugshot images
- Link to full results

4 Link to Captis produces the full results and dossiers of each potential match

Kimani Randolph
AKA: Crazy "R", Baller

Height	Weight	Ethnicity
5'7"	165	African American

Phone 1   E-mail

Address 1   Address 2

Address 3   Arrest #1
             Theft
             Sacramento County
             Sheriff's Dept
             Case #13-4712

Arrest #2
Possession of a controlled substance
Sacramento Police Dept
Case #138-453

Arrest #3
Robbery
Sacramento County
Sheriff's Dept
Case #15-6723

5 The operator is then able to use this information to assess the level of response or escalation needed.

Post-Incident Investigation

Immix users also have the option to utilize Captis following an incident, uploading any image - whether inside or outside of Immix - to Captis for analysis.

Upload or "Drag & Drop" any facial still-image from your surveillance system

The image will be immediately scanned across The Captis Database

Results appear within seconds based on percentage match

Key Features

- Identify subjects in just seconds

- 100 Million + public criminal files

- Used at over 30,000 locations to date

- Non-intrusive & privacy supported

- No hardware investment required

Key Benefits

- Strengthen relationships with law enforcement

- Provide crucial information to first responders

- Enact real change at monitored sites

Customer Testimonial

"We're now closing over 50 percent of our violent crimes within a week. It has become one of the most interesting and quick successes that I have ever had with a new solution—and I've been in AP for forty years."

ROBERT OBEROSLER

FORMER VICE PRESIDENT OF ASSET PROTECTION / RITE AID
